Jongyul Kim

Postdoctoral Research Associate
Computer Science, University of Illinois at Urbana-Champaign

yulistic@gmail.com http://yulistic.com

RESEARCH INTERESTS

My research goal is to design system software to utilize emerging hardware technology efficiently and effectively. My research interest lies in file systems, disaggregated systems, smart devices, and CXL (Compute Express Link).

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST) Daejeon, South Korea
Ph.D. *Integrated master's/doctoral program in School of Computing* Feb. 2022
Thesis: "Distributed Persistent Memory File System for Programmable NIC"
Advisors: Seungryoul Maeng and Youngjin Kwon

Korea Advanced Institute of Science and Technology (KAIST) Daejeon, South Korea
B.S. *Double-majored in Computer Science and Management Science* Feb. 2012

WORK EXPERIENCE

Postdoctoral research associate, University of Illinois at Urbana-Champaign Urbana, IL, USA
Department of Computer Science, Host: Tianyin Xu. Sep. 2023 – present

Postdoctoral researcher, KAIST Daejeon, South Korea
School of Computing, Host: Youngjin Kwon. Mar. 2022 – Sep. 2023

Software developer/Startup co-founder, Durooh, Inc. Seoul, South Korea
Developed a front-end Android application. Jun. 2011 – Feb. 2013

Undergraduate intern, TestMidas Co., Ltd. Daejeon, South Korea
Analyzed *Wine* source code to port Windows system calls to Linux. Jun. 2009 – Aug. 2009

RESEARCH EXPERIENCE

University of Illinois at Urbana-Champaign (UIUC) Urbana, IL, USA

- **Postdoctoral Research Associate** Sep. 2023 - present

  Direct memory translation mechanism. [1] (Oct. 2023 – Apr. 2024)
  - Design a fast memory translation mechanism for native and virtualization environments that reduces the number of memory accesses by mapping the last-level page table entry directly.

Korea Advanced Institute of Science and Technology (KAIST) Daejeon, South Korea

- **Postdoctoral Researcher** Mar. 2022 - Sep. 2023

  File system with computational storage for high development velocity (Oct. 2022 – present)
  - Design file system that leverages the processing power of computational storage for high development velocity.
  - Develop a framework that offloads file system operations to computational storage.

  In-SmartNIC metadata cache for Lustre client (May 2022 – Dec. 2022)
  - Analyzed the latency of metadata requests by a Lustre client.
  - Developed Metadata Cache that operates on client-side SmartNIC to reduce the metadata lookup latency.

  Operating system design for memory disaggregation [10] (Dec. 2021 – May. 2022)
  - Discovered the major cause of a bottleneck in a Linux-based operating system for memory disaggregation.

- **Research Assistant** Mar. 2013 - Feb. 2022

  SmartNIC offload of distributed persistent memory file system [2, 6] (Jun. 2019 – Jan. 2022)
  - Identified an interference problem in the client-local persistent memory distributed file system.
  - Developed a rack-scale distributed file system that utilizes hardware features including persistent memory, RDMA, computing and memory resources of SmartNIC, and a memory copy DMA engine of Intel CPU.

  Distributed file system with persistent memory [3, 8] (Oct. 2018 – Oct. 2020)
  - Participated in developing a rack-scale distributed file system that utilizes persistent memory and RDMA.

– Analyzed the performance of the persistent-memory-based distributed file system, NFS, and Ceph file system.

On-demand virtualization for bare-metal cloud [4, 7] (Jul. 2015 – Sep. 2018)
– Devised an On-demand Virtualization technique that transforms a bare-metal machine into a virtual machine or vice versa at run-time.
– Demonstrated a live migration and checkpointing of a bare-metal instance.

Memory-centric architecture with processing-in-memory (Mar. 2016 – Oct. 2018)
– Research on a memory-centric architecture that utilizes the processing power of Hybrid Memory Cube (HMC).
– Implemented multi-HMC architecture and a memory management logic with Gem5 and McSimA+ simulators.

TEACHING EXPERIENCE

Teaching Assistant at KAIST

- Digital System and Lab (CS211) Spring 2014 (Head), Spring 2015 (Head)
  Lab sessions: VHDL (Hardware description language) programming.
- Embedded Computer Systems (CS310) Fall 2013 (Head), Fall 2014, Fall 2015
  Lab sessions: FPGA and Arduino micro controller programming.
- Embedded Computing (SEP561) Spring 2014 (Head), Spring 2015, Spring 2019
  Lab sessions: FPGA and Arduino micro controller programming.

Mentoring at KAIST

- Jaehwan Lee Aug. 2021 – Dec. 2021
  Multi-thread support in the persistent-memory-based file system.
- Guseul Heo Aug. 2021 – Dec. 2021
  Replacing the extent tree with hash-based file mapping in the persistent-memory-based file system.
- Donggeun Kim Jan. 2022 – Aug. 2022
  Replacing the extent tree with hash-based file mapping in the persistent-memory-based file system (continued).

Hosting Seminar at UIUC

- UIUC Systems Research Seminar (CS 591) Spring 2024

AWARDS

- 2022 Spring KAIST Breakthroughs (Biannual Engineering Research Webzine), 2022.
- Best Dissertation Award, School of Computing, KAIST, 2022.
- SOSP 2021 Best Paper Awards, ACM SIGOPS 28th Symposium on Operating Systems Principles, 2021.
- 2014 Fall Best Teaching Assistant Awards, School of Computing, KAIST, 2015.
- 2013 Fall Best Teaching Assistant Awards, School of Computing, KAIST, 2014.

PUBLICATIONS

CONFERENCE PAPERS

PATENTS & APPLICATIONS

All patent applications are in processing, except when mentioned otherwise.

1. KO/US/CN/EP, 10-2022-0173904, "COMPUTABLE NETWORK INTERFACE CARD AND ELECTRONIC APPARATUS INCLUDING THE SAME", Dec 2022.
2. KO, 10-2022-0165086, "METHOD FOR MANAGING MEMORY AND COMPUTER DEVICE FOR THE SAME", Nov 2022.

TALKS

CONFERENCE TALKS

1. "LineFS: Efficient SmartNIC Offload of a Distributed File System with Pipeline Parallelism", *The 28th ACM Symposium on Operating Systems Principles (SOSP 2021)*, Virtual, October 2021.

INVITED TALKS

2. "LineFS: Efficient SmartNIC Offload of a Distributed File System with Pipeline Parallelism", UIUC Systems Research Seminar, Urbana, IL, US, January 2024.
3. "Persistent-memory-based Distributed File System and SmartNIC Offloading", *Electronics and Telecommunications Research Institute (ETRI)* Seminar, Daejeon, South Korea, Mar 2023.
4. "Persistent-memory-based Distributed File System and SmartNIC Offloading", *Electronic & Information Research Information Center (EIRIC)* Seminar, Virtual, June 2022.
5. "LineFS: Efficient SmartNIC Offload of a Distributed File System with Pipeline Parallelism", Top conference session in *Korea Software Congress 2021 (KSC 2021)*, Pyeongchang, Gangwon, South Korea, December 2021.

SERVICE

Journal Reviewer

- ACM Transactions on Storage, 2022.

Conference PC Member (E: external reviewer)

- Usenix ATC, 2024, (E).

Shadow PC Member

- ACM European Conference on Computer Systems (EuroSys), 2023.

SKILLS

PROGRAMMING

- C, C++, Java, Python, Shell
- File system, RDMA, Persistent memory, Virtualization, SoC-based SmartNIC, Distributed system, Android, Gem5 simulator

LANGUAGES

English, Korean (Korean citizen)
